Ambitious third-year computer science student eager to apply my strong programming background in practice. Seeking to contribute to innovative projects, enhance technical skills, and gain real-world experience

WORK EXPERIENCE

J.T Weston sp. z o.o.

Warsaw • 02/2024 - 03/2024

Python Developer

Internship

- Working on converting speech to text for chatting on a web page using REST API
- Real time sending data to neural network by detecting silence
- Very organized team work using Jira Software with Kanban method

PROJECTS

Sleep Aid Device • 03/2024 - 06/2024

A device designed to help people achieve better sleep quality. In the accompanying app, users can input various parameters such as their desired wake-up time or bedtime. An hour before bedtime, the device will measure temperature, humidity, and light intensity, providing advice through notifications on the user's phone. For instance, it might suggest opening a window or turning off the lights.

Wanna Cook • 10/2023 - 01/2024

A recipe website where users can share their cooking ideas, discuss recipes, and evaluate others' skills. Users can save various recipes and organize them according to their preferences.

SKILLS

- Python
- Git
- Django
- Jira
- REST APIs
- SQL
- C++

EDUCATION

Bachelor in Industrial Automation

Wrocław University of Science and Technology

Wrocław

10/2021 - 03/2025

A third year student on the faculty of Computer Science and Telecommunications. Specialty Industrial Automation.
